CURRICULUM VITAE

SHUBHAM MOHAN THOMBARE

Shubhamthombaresmt@gmail.com | 7768026337

OBJECTIVE

To seek a position for utilizing my skills and abilities in Pharmacovigilance that offers professional growth while being innovative and flexible.

PROFILE SUMMERY

- A result-oriented professional with more than **3 year of experience** in Pharmacovigilance.
- Remarkable knowledge to monitor and track **Serious Adverse Events, serious and non-serious adverse drug reactions**, and other medically related project information.
- In-depth knowledge of **Pharmacovigilance compliance**.

EXPERIENCE

Cognizant Technology Solutions
Junior Data Analyst 05 Jan 2023 to till date

- Responsible for case processing of **Individual Case Safety Reports (ICSRs)** of all case types (spontaneous, solicited programs).
- Performed **validation of minimum criteria, duplicate checks**, and **data entry** using pharmacovigilance systems.
- Gained understanding of **regulatory reporting requirements (FDA, EMA,)** for adverse drug reactions (ADRs).
- **Processing Safety Cases**: Managed the processing of individual case safety report (ICSR) from various sources, including CIOMS, co-marketers, social media, medical information, and patient support programs, utilizing Veeva Vault for safety case processing.
- Regulatory Knowledge: Possess in-depth knowledge of **regulatory timeline guidelines governing pharmacovigilance**. Compliance Adherence as Ensure strict adherence to established and updated local and global processes and guidelines, as well as national and international regulations.
- **Effectively coding** all medical history, events, drugs/procedures/indications and laboratory tests according to the appropriate dictionary (e.g. company product dictionary)
- **Causality assessment** in ICSR involves evaluating the relationship between the reported adverse event and the pharmaceutical product to determine whether the drug is likely responsible for the event, using criteria such as temporal association, known side effects, and alternative causes.
- **Initial Received Date identification** in ICSR refers to determining the first date on which the adverse event report was received by the pharmacovigilance or regulatory authority, which is crucial for tracking reporting timelines and ensuring compliance with regulatory deadlines.
- **Identification of non-qualifiable** cases in ICSR lack sufficient information for assessment, non-valid cases are invalid due to patient information not available in report and product quality complaints involve concerns about manufacturing or labelling that may affect patient safety.
- **Narrative writing** in ICSR involves providing a clear, detailed, and chronological account of the adverse event experienced by the patient, including relevant background information, the sequence of events, the suspected product, outcomes.
